COMMENTARY

Our fund had a good month with the NAV per share of our flagship USD class rising 4.0%, compared to the World Index that was down 0.7%. Our goal is to generate real returns for our clients over time and it pleases us that both our old and new clients have all enjoyed capital appreciation. The most significant contributors to returns over the past few months were our European and Hong Kong investments.

In the good times we remind ourselves of our errors - we don't get every investment call right because the future is unpredictable. We were disappointed this month by the results of a small holding in Jupiter Asset Management. We all know that the asset management industry is battling fee pressure, but there are some attractive features of owning these businesses - annuity income, great cash flow, minimum capital expenditure, no bad debts and a high proportion of variable costs (bonuses). Jupiter has half its market cap in surplus cash (£220m) so we were hopeful for more than a paltry £13m buyback announcement and the halving of their dividend. Higher costs, in particular higher variable staff compensation when revenue declined, did not sit well with us. We concluded that management are "not on our side" and sold at a 6% loss including the dividend receipts since we'd invested.

On a brighter note, post month-end we sold the last of our position in Societe Generale. In the latter part of last year, following President Macron's surprise election announcement, we were presented with an opportunity to increase our small position at a share price in the low €20's, equal to 30% of net asset value. This month, Societe Generale reported encouraging results, but France still faces the same budgetary issues that caused investors to panic in December 2024. The share price has moved from offering substantial value to being above our assessment of fair value in only a matter of months. We sold the last of our stake above €40 to allow us to invest in other ideas with more upside to our estimate of fair value.

We hope these two examples highlight the attraction of our Value-based investment approach and the asymmetry embedded in this approach - if we're right more often than we're wrong, and generate a much higher return when we're right than any loss suffered when we're wrong (due to margin of safety), we will compound capital at an attractively high rate. That is our objective.

The TER/OCF is a measure of how much of the Fund's assets are relinquished as payments for services rendered in the administration and management of the Fund. Transaction Costs represent sums paid to third parties when buying and selling the underlying assets of the Fund and primarily comprise stamp duties, investment transaction levies and broker commissions. Both the TER/OCF and TC are expressed as a percentage of the average Net Asset Value (NAV) of the Fund calculated over a period of one year. Measurement period: 1 March 2024 - 28 February 2025. Average NAV over measurement period \$345.3m

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

NOTES AND DISCLAIMERS

UCITS funds are required to calculate an Ongoing Charges Figure (OCF). It is a measure of the costs of operating the Fund. It is calculated in accordance with a methodology published by European regulators. The OCF of the Fund was 1.13%, calculated based on operating expenses of the Fund for the 12 month period ended 31/12/24 as a percentage of average Fund net assets of \$293.3m over the same period. The OCF includes all fund operating expenses for the USD, GBP and EUR investor classes, but excludes the 0.5% payable to the financial intermediary for the USD Advisor class. The OCF figure is not applicable to the USD Institutional class. The Investment Manager has agreed with the Fund to rebate a portion, or all, of the Investment Management Fee attributable to the USD Institutional Class in order to facilitate the capping of the Capped Fees incurred by Shareholders in USD Institutional Class at an annualised 1.00%, subject to certain limitations. Please refer to the prospectus of the Fund for further details. The OCF methodology does not include broker commissions, stamp duties or other explicit costs of transactions, which were an additional 0.37% over the aforementioned period.

The Fund's benchmark is the MSCI World Index, a broad global equity benchmark that represents large and mid-cap equity performance across 23 developed markets. It covers approximately 85% of the free float-adjusted market cap in each country and does not offer exposure to emerging markets. The Fund is actively-managed and its investment objective is to outperform the MSCI World Index* and to provide capital growth over a medium to long-term time horizon. The Investment Manager applies a bottom-up, "valued-based" research-driven stock picking method. The Ranmore Global Equity Fund GBP and EUR classes are not currency hedged classes. The difference between the returns in these classes and the USD class is due only to changes in the GBP/USD and EUR/USD exchange rates over the measurement period. Net Asset Value per Share prices shall be published on the Business Day immediately succeeding each Valuation Point on www.bloomberg.com. Additional information on the Fund, including, but not limited to: the prospectus, Key Investor Information Document (KIID) (UK investors), Application Forms, the annual audited financial statements and the unaudited interim financial statements may be obtained, free of charge, from the Investment Manager at www.ranmorefunds.com and are published in English. South African investors

Ranmore Global Equity Fund plc is approved in terms of section 65 of the Collective Investment Schemes Control Act (2002) for marketing and distribution in South Africa. This factsheet is a Minimum Disclosure Document (MDD) as required by the Financial Sector Conduct Authority (FSCA) of South Africa. Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of shares in the Fund may go down as well as up, and past performance is not necessarily an indication of future performance or returns. Neither Ranmore Fund Management Ltd nor Ranmore Global Equity Fund plc provides any guarantee with respect to capital protection of the Fund's returns. Collective Investment Schemes trade at ruling prices and can engage in borrowing. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

Ranmore Global Equity Fund plc is an accumulation fund. As such, there have been no distributions over the past 12 months.

Highest return over any rolling 12-month period: 97.7%. Lowest return over any rolling 12-month period: (19.7%)

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

The Total Expense Ratio (TER) is a measure of how much of the Fund's assets are relinquished as payments for services rendered in the administration of the Fund. Transaction Costs are a measure of the costs incurred in buying and selling the underlying assets of the Fund. Both the TER and TC are expressed as a percentage of the daily NAV of the Fund calculated over a period of three years on an annualised basis.

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

A schedule of fees and charges and maximum commissions is available on request from the manager.

The Morningstar Rating is an assessment of a fund's past performance – based on both return and risk – which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. The Fund's USD Investor Class has received an Overall 5-star rating as at 5/3/2025.

FE fundinfo

FE fundinfo Crown Fund Ratings enable investors to distinguish between funds that are strongly outperforming their benchmark from those that are not.
